

## Design Partners

TowerJazz partners with independent design houses that have specialized design capabilities to create integrated circuit (IC) designs.

TowerJazz design partners can assist in all or part of the design flow. Chipmakers can also augment their own design resources with design capabilities from TowerJazz's partners that are specialized for its manufacturing technologies. TowerJazz chooses design partners for the program based on their ability to provide proven, high-quality services and to create designs that comply with its design and verification rules.

**DA-Integrated** offers a comprehensive suite of services spanning the complete IC value chain from design specification through volume manufacturing. With more than 50 customers, 200 IC projects and millions of units shipped, DA-Integrated has a proven track record of helping customers optimize development cost, time to market, product quality and cost of goods sold.
